

**Diesel Force™**

**NOW OFFERING DIESEL TRUCK  
ENGINE CLEANING WITH DIESEL FORCE™**

**SAVE UP TO 90%**

**ON YOUR DIESEL EMISSIONS SYSTEM MAINTENANCE COSTS**

EGR Systems can become clogged with carbon deposits that impact fuel economy and performance. The Diesel Force Diesel Emissions System Tool applies a powerful foaming cleaner directly into the EGR circuit. This rapidly dissolves carbon and eliminates issues commonly associated with EGR component failure without the need for costly teardowns and parts replacement.

You'll see:

- System restoration without teardown
- Reduced component failures, downtime, road service calls and towing
- Increased reliability, fuel efficiency and power under load
- Overall reduction in operating expenses and increase in vehicle longevity and resale value
